## **RE/MAX National Housing Report for October 2022**

### *More Inventory, Fewer Homes Selling As Sale Prices Slowly Dip*

---

**DENVER** — October revealed a vastly different housing market from one year ago, with 30.7% fewer closings, 36.8% more homes for sale, and the average home taking nearly a week longer to sell, at 35 days on market. As a result, the Median Sales Price was pushed down 0.3% to \$399,000 from September's \$400,000 – the third straight month of decline.

Across the report's 53 metro markets, all 10 months of 2022 thus far have posted lower home sales compared to 2021. October was the sixth consecutive month with more for-sale signs than the same month last year.

Compared to September, home sales in October were down 13.5% while inventory grew 2.9%. Homes were on the market one day longer.

"The historic pace and magnitude of interest rate increases have created a reset and softened the housing landscape as intended," said Nick Bailey, RE/MAX President and CEO. "In these conditions, homebuyers should be able to consider multiple properties instead of fighting over one. For many buyers, it's less about the actual interest rate right now, and more about affording the down payment and monthly mortgage payments, and whether the property fits their needs."

Christine Dupont Patz, Broker Associate/Co-Owner of RE/MAX Cherry Creek in Colorado adds, "Buyers are taking a breath and are not as rushed as they were in the spring. There is much more negotiating – from price and concessions to inspection items. We're hearing the word 'value' a lot more from buyers; they want to be sure that the home value warrants dealing with the higher interest rates."

Other notable metrics include:

- The Median Sales Price has dropped 6.3% since peaking at \$426,000 in June.
- The number of new listings dropped 11.1% from September and was down 17.2% from October 2021.
- The 2.3 months' supply of inventory in October was up from 2.0 in September and 1.3 one year ago. The number of homes for sale has grown in six of the last seven months.
- The average Close-to-List Price Ratio in October was 98%, meaning that homes sold for 2% less than the asking price. The ratio was 99% in August and September after being at 100% or above through the first seven months of 2022. It was 101% in October 2021.
- Days on Market grew year-over-year by six days, from 29 to 35.

### **Report Details**

Beginning with the April 2022 report, RE/MAX is using a new source for aggregated data.

The RE/MAX National Housing Report is distributed monthly on or about the 15th. The Report is based on MLS data for the stated month in 53 metropolitan areas, includes single-family residential property types, and is not annualized. For maximum representation, most of the largest metro areas in the country are represented, and an attempt is made to include at least one metro area in almost every state. Metro areas are defined by the Core Based Statistical Areas (CBSAs) established by the U.S. Office of Management and Budget.

### **Definitions**

Closed Transactions are the total number of closed residential transactions during the given month. Months Supply of Inventory is the total number of residential properties listed for sale at the end of the month (current inventory) divided by the number of sales contracts signed (pending listings) during the month. Where “pending” data is unavailable, an inferred pending status is calculated using closed transactions. Days on Market is the average number of days that pass from the time a property is listed until the property goes under contract. Median Sales Price for a metro area is the median sales price for closed transactions in that metro area. The nationwide Median Sales Price is calculated at the nationwide aggregate level using all sale prices from the included metro areas. The Close-to-List Price Ratio is the average value of the sales price divided by the list price for each closed transaction.

MLS data is provided by Seventy3, LLC, a RE/MAX Holdings company. While MLS data is believed to be reliable, it cannot be guaranteed. MLS data is constantly being updated, making any analysis a snapshot at a particular time. Every month, the previous period’s data is updated to ensure accuracy over time. Raw data remains the intellectual property of each local MLS organization.
